

The ISG team can offer specific programmatic strategies and tactics that have demonstrated positive outcomes in preventing and treating substance use and related behavioral health disorders. Our team literally has decades of hands-on personal experience in a variety of geographies, program environments and roles at the table. Behind the scenes, and in smooth collaboration with leaders already engaged in this process, we bring an independent and steady hand that maximizes optimal resource allocation and establishes effective analytical metrics.

The behavioral health industry is changing in an effort to meet the needs of patient who have more severe substance use issues and more challenging mental health symptoms as well as the downstream impact of these issues on payer behavior. ISG can provide support to meet the challenges of the new environment with the following services:
